1- BLOCKCHAIN & BITCOIN

The biggest achievement of the last century was the arrival of the internet. It converted regular economies to a shared global economy. Classic example Uber, amazon, eBay, Airbnb and more. As we moved into the new millennium, emerged the rise of a new generation of Internet based technology known as the Blockchain. Today, the blockchain has become a super phenomenon mainly because of its iron strong decentralized digital coding system. This popular phenomenon is now setting the tone for the digital financial culture and traditions for the next 100 years. But the Blockchain only gained popularity in 2009 by building its own currency by the name of Bitcoin.

2- SMART TOKENS

Smart Tokens based on multiple blockchain solutions will be the undisputed next generation of the World Wide Web. Why? Because this technology is going to touch all our lives in the future individually and business wise. Think about it. All currencies at the moment are backed by Governments. But is there any currency module which is truly decentralized and global? Or at least has the potential to become replacement to the existing physical currencies? Yes, there is. And it's called smart tokens or in a layman's term "digital Currency.

3- WHAT IS STYLEOCOIN ?

"IMAGINE IF IT TOOK 3.8 SECONDS TO SETTLE A DIGITAL TRANSACTION."

STYLEOCOIN will target the hospitality, travel and tourism industry, Pay bills, use as a payment gateway to make smart contracts and smart agreements running on multiple blockchain ecosystem.

So, what are smart tokens? Smart tokens are based on the revolutionary smart chain that enable to settle contracts and send payments over the internet with fixed rules and without a third party. 14- SMART TOKEN VS CORRESPONDENT BANKING

The world we are heading into conducts electronic transaction and payment verifications without the need of a trusted third party. There is a dramatic cross-border payment gap with services available today. The needs of the growing markets offer a lot of room for financial institutions to grow their bottom line. This goes against the principles of sharing of wealth through prosperity.

However, this problem will easily be solved as mainstream acceptance of digital currency & smart tokens is picking up quickly and not news anymore. Businesses are converting faster with an unmeasurable velocity of speed. As the frequency of the user experience increases the success chances of this token exponentially increase. So now that the central authorities have competition. What can they do? Can they stop this revolution? They cannot. The only thing they can do is to compete with it. But guess who will eventually win this race. The centralization authority who wants to control its people or the people who are seeking decentralization. Let's leave this unanswered for the moment. But you will know soon enough.
